

ALEX AT WORK....

Videoconferencing Overload

Must maintain eye contact....
must maintain eye contact
...this hurts my head

Is it my turn to
talk? Should I say
something?

What's your
view, Alex?

Ummm.....

What if I talk
and it isn't my turn?
What if I talk over
someone?

This is SO much
harder than face-to-face
meetings where I can look
around the room or fake eye
contact.

Oh no, I was so
focused on keeping eye
contact, I couldn't pay
attention to what they
were saying!

I wonder if they are
recording this. What if I
accidentally say something
really dumb and it's there
forever..

HOMETIME....

I am so exhausted, I can't
move. Maybe if I stay here
under my weighted blanket
until bedtime, I will have
enough energy to do it all
again tomorrow
